What if the clock appears when the m button is pressed. The clock will appear if too much time passes between pressing the m button and the n button in Step 2. If the clock appears, press the m button to remove the clock and repeat Step 2. Formatting initializing a memory card erases all data on the memory card. As you cannot retrieve the erased data, exercise adequate caution before formatting the memory card. Be careful when transferring or disposing of a memory card. When disposing of a memory card, take precautions such as physically destroying the card to prevent personal information leaks. The camera can also detect and focus on faces, setting the color and brightness to optimal levels. The scene icon p. 164 that appears on the screen may not match the actual scene.Switching to Shooting mode Pressing the shutter button halfway, or turning the mode dial in Playback mode switches the camera to Shooting mode. Enter Playback mode. Press the 1 button. The last image you took will appear. Please note that erased images cannot be recovered. Exercise adequate caution before erasing an image. Enter Playback mode. Press the 1 button. The last image you took will appear. Choose an image to erase. This prevents incorrect operation of the camera, allowing even beginners to take worryfree pictures. Remaining Time Enter E mode. Set the mode dial to E. Compose the shot. Moving the zoom lever toward i will zoom in on your subject, making it appear larger. However, movies shot at zoom factors that appear in blue will be coarse.

Operation sounds will be recorded. Shooting Time Memory Card Shooting Time. How can I play back movies on a computer. If you are already using software included with another Canon brand compact digital camera, install the software from the included CDROM, overwriting your current installation. Transferring Images to a Computer for Viewing Install the Software. Windows Place the CD in the computer's CD ROM drive. <http://ecocarfuerteventura.com/images/editor/crate-vc-2110-manual.xml>

Place the supplied CDROM DIGITAL CAMERA Solution Disk p. 2 into the computer's CDROM drive. CameraWindow will appear. Click on the task bar. Double click Transfer and View Images You can transfer images even without using the image transfer function in the included software by simply connecting your camera to a computer. Some accessories are not sold in some regions, or may no longer be available. Power Supplies You can also purchase NiMH Battery NB4300, a set of four rechargeable AA NiMH batteries separately. Battery and Charger Kit CBK4200 can also be used. This product is designed to achieve excellent performance when used with genuine Canon accessories. P Mode Choose settings yourself to take various types of pictures p. 80. Live View Control Mode The brightness and color can be easily set to your preferences for shooting p. Shooting No Information Display Playback No Information Simple Information Display You can also switch the display by pressing the l button while the image displays right after shooting. However, the brightness of the image on the screen, and the brightness of the actual image recorded may be different. The menu items are organized under tabs, such as for shooting 4 and playback 1. Change the volume. Press the op buttons to choose an item, then press the qr buttons to adjust the volume. Move the zoom lever to choose the 3 tab. Adjust the brightness. Press the qr buttons to adjust the brightness. Power Saving during Shooting The screen will turn off approximately 1 minute after you stop operating the camera. This chapter assumes that the camera is set to A mode. What if a flashing When you press the shutter button halfway in low light conditions where camera shake is likely, a flashing tripod to prevent it from moving. Press the r button. However, depending on the recording pixel setting p. 61 and zoom factor, the images may appear coarse the zoom factor will appear in blue. Once inserted, however, they cannot be deleted.

Be sure to check beforehand that the date and time are correctly set p. 18. Display the menu. If you choose, you cannot use the digital zoom p. 55 or digital tele converter p. 56. Changing the Compression Ratio Image Quality You can choose from the following 2 compression ratios image quality Fine, Normal. Enter K mode. Set the mode dial to K. Choose a Shooting mode. After pressing the m button, press the op buttons to choose Press the qr buttons to choose a Shooting mode, then press the m button. Move approximately 1 m 3.3 ft. or more away from your subject and shoot. You can adjust the brightness of the image. The more to the right, the Brightness brighter the image gets, the more to the left, the darker the image gets. Use this mode in areas where camera sounds, lights and flash are not permitted. When the camera is set to in Playback mode. Operation sounds will be muted, and audio will not play back when viewing movies. Adding Effects and Shooting Creative Filters Shoot images with vivid colors Super Vivid Lets you take shots with vivid, intense colors. Standard Images will look like they were shot with a toy camera. Lets you shoot black and white images. Sepia Lets you shoot sepia toned images. Blue Lets you shoot blue and white images. What if a smile is not detected. Smiles are easier to detect if the subject faces the camera, and opens their mouth enough to show some teeth when smiling. The camera will shoot approximately two seconds after it detects a wink. Changing the number of shots in Step 1, press the op buttons. Changing the number of shots in Step 1, press the op buttons. Shooting Long Exposures You can set the shutter speed to a range between 1 and 15 seconds to shoot long exposures. However, you should attach the camera to a tripod to prevent the camera from moving and blurring the image. AE stands for Auto Exposure. Automatically sets the optimal white balance for the shooting Auto conditions.

Day Light For shooting outdoors, in fine weather conditions. Cloudy For shooting in cloudy, shady or

twilight conditions. For shooting outdoors, in fine weather conditions. For shooting in cloudy, or twilight conditions. High For shooting nightscapes, or in dark interiors. Also, when the overall image is lacking in contrast, the camera will automatically correct the image for a sharper impression when shooting. My Colors Off Vivid Emphasizes the contrast and color saturation for a vivid impression. Neutral Tones down the contrast and color saturation for neutral hues. The edges of the image may darken if the flash fires. This is effective for focusing on a specific point. After locking the focus, the focal distance will not change even when you release your finger from the shutter button. Lock the focus. Keep the shutter button pressed halfway and press the **q** button. The focus locks and % appears on the screen. Enter Face Select mode. Point the camera toward the face of the subject and press the **0** button. For standard shooting conditions, including back lit shots. Evaluative Automatically adjusts the exposure to match the shooting conditions. Center Averages the light metered from the entire frame, but gives greater Weighted Avg. AE stands for "Auto Exposure". Shooting with the FE Lock Just as with the AE lock, you can lock the exposure for shooting with the flash. FE stands for "Flash Exposure". At the same time, you can use a slow shutter speed to brighten the background that the light from the flash cannot reach. Redeye correction may be applied to areas other than red eyes. Shooting procedures are the same as when using the screen. The camera will automatically focus on subjects, but it will not detect and focus on faces. E Standard Miniature Effect Shoot Movies That Look Like a Miniature Model Miniature Effect You can shoot movies that look like moving miniature models.

You create the miniature model effect by choosing the upper and lower portions of the scene that will be blurred, and the playback speed, which makes people and objects in the scene move quickly during playback. The exposure shift bar appears. Some functions, however, may not be available depending on the Shooting mode. Refer to "Functions Available in Each Shooting Mode" and "Shooting Menu" pp. The movie editing panel and the movie editing bar will appear. Searching Images by Scrolling Pressing the **qr** buttons for more than 1 second will display images in a line letting you quickly search them. Position of currently displayed image Jump to Favorites Jump 10 Images Jump 100 Images Jump Shot Date —. If you press the **qr** buttons during playback, the image will switch. The focus check display is not available for movies. Press the **l** button to switch to the focus check display p. 43. For images with detected faces, you can also switch to the focus check display by pressing the **0** button. Displaying Various Images Smart Shuffle The camera will choose four images based on the displayed image. If you choose one of those images, the camera will select four more images letting you enjoy playing back images in an unexpected order. White or black Yellow Yellow Black What if the images don't display correctly on the TV. Protected images cannot be erased with the camera's erase function. To erase an image, cancel protection settings first. Select Range Protect the image. If you press the **n** button, a confirmation screen will appear. Choose an ending image. Since erased images cannot be recovered, exercise adequate caution before erasing. Protected images p. 117 cannot be erased. If you press the **n** button, a confirmation screen will appear. You can also filter out just those images for viewing p. 111. If you switch to Shooting mode or turn off the power before completing the setting in Step 3, images will not be tagged as favorites.

Also, when the overall image is lacking in contrast, the camera will automatically correct the image for a sharper impression. Canon Brand PictBridge Compliant Printers This chapter uses Canon brand SELPHY CP series printers in the explanations. The displayed screens and available functions will differ depending on the printer. Please also refer to the Printer User Guide. Connect the camera to the printer. Open the cover and insert the cable's small plug firmly into the camera terminal in the direction shown. Choose an image. Press the **qr** buttons to choose an image, then press the **m** button. Connect the camera to the printer. Choose a paper size. Press the **op** buttons to choose an option, then press the **m** button. Prints with a border. Prints without a border. Choose how many copies of an image are printed on a sheet. Prints ID photos. Only images with the same resolution as the camera's Large recording pixel setting can be chosen. Connect the camera to the printer. These

selection methods comply with the DPOF Digital Print Order Format standards. These settings will be overwritten with those set by your camera. Choose images. Follow Steps 2 and 3 on p. 118 to choose images. The first part of this chapter explains convenient and commonly used functions. The latter part explains how to change shooting and playback settings to suit your purposes. As you cannot retrieve the erased data, exercise adequate caution before formatting the memory card. Registering Recorded Images as the Startup Screen When you press the 1 button and set the camera to Playback mode, you can register an image. Refer to the Software Guide for details. Changing the Lens Retract Time For safety reasons, the lens retracts about 1 minute after pressing the 1 button when in a Shooting mode p. Using the World Clock When traveling abroad, you can record images with local dates and times simply by switching the time zone setting. Set the world time zone. Press the qr buttons to choose the world time zone.

Changing the Way the Image Displays Right After Shooting You can change the way the image displays right after shooting. Open the cover and remove the AA batteries p. Do not unplug the plug or power cord with the camera turned on. This could erase images you have taken or damage the camera. If the items below do not solve your problem, contact a Canon Customer Support Help Desk as listed on the included customer support list. Power You pressed the power button, but nothing happened. Subject Moving Background Bright Backlit Including Blue Skies Backlit. Sound Options Set the sounds for each camera operation. Startup Image Add an image as a startup image. Format Formats memory card, erasing all data File Numbering. Slideshow Plays back images automatically. Erase Erases images Select, Select Range, All Images. Protect Protects images Select, Select Range, All Images. Rotate Rotates images. Favorites Tags or untags images as favorites. My Category Categorizes images Select, Select Range.
