Guaranteed 24 months if not tampered with. The case consists partly of cast aluminium, inside of which operates the nonreversible electromechanical gearmotor, and partly of a covering in ABS plastic inside of which is an electronic card and the transformer. Perfect alignment with the guide rail is made possible by the patented builtin regulation system, which consists of slots for horizontal adjustment;. Note do not allow the gate to strike the mechanical stops in the open or closed positions. 5.8 Manual release of the gearmotor To open the access door, insert the key A, push down and rotate clockwise. The control systems are powered by low voltage 24V and protected by a 1A fuse. The total power consumption of the 24V accessories must not exceed 20W. When the gate leaf is closing, opening the contact triggers the inversion of the direction of movement until the gate leaf is fully open. The adjustable set time of operation, is in any case subordinate to the operation of any safety accessories and is excluded after a total "stop". Con contact N.O.
